

Dont believe the truth.

According to the author John Hamer, on the 30th of April 1945, Hitler, Eva Braun and a small group of friends flew to Norway before proceeding to Argentina in a U-Boat.

Hitler reportedly died in Mendoza in December 1985 aged 96.

John backs up his information with a handful of quotes which – amongst others – are the following two:

“We know for sure that Hitler fled either to Spain or to Argentina”. Josef Stalin in conversation with the US Secretary of State, James Byrne in late 1945.

“Russia must accept much of the blame that Hitler did not die in 1945”. Michael Mussmano , presiding judge at the Nuremberg trials 1946.
